VGU – 25 Days In-campus Training

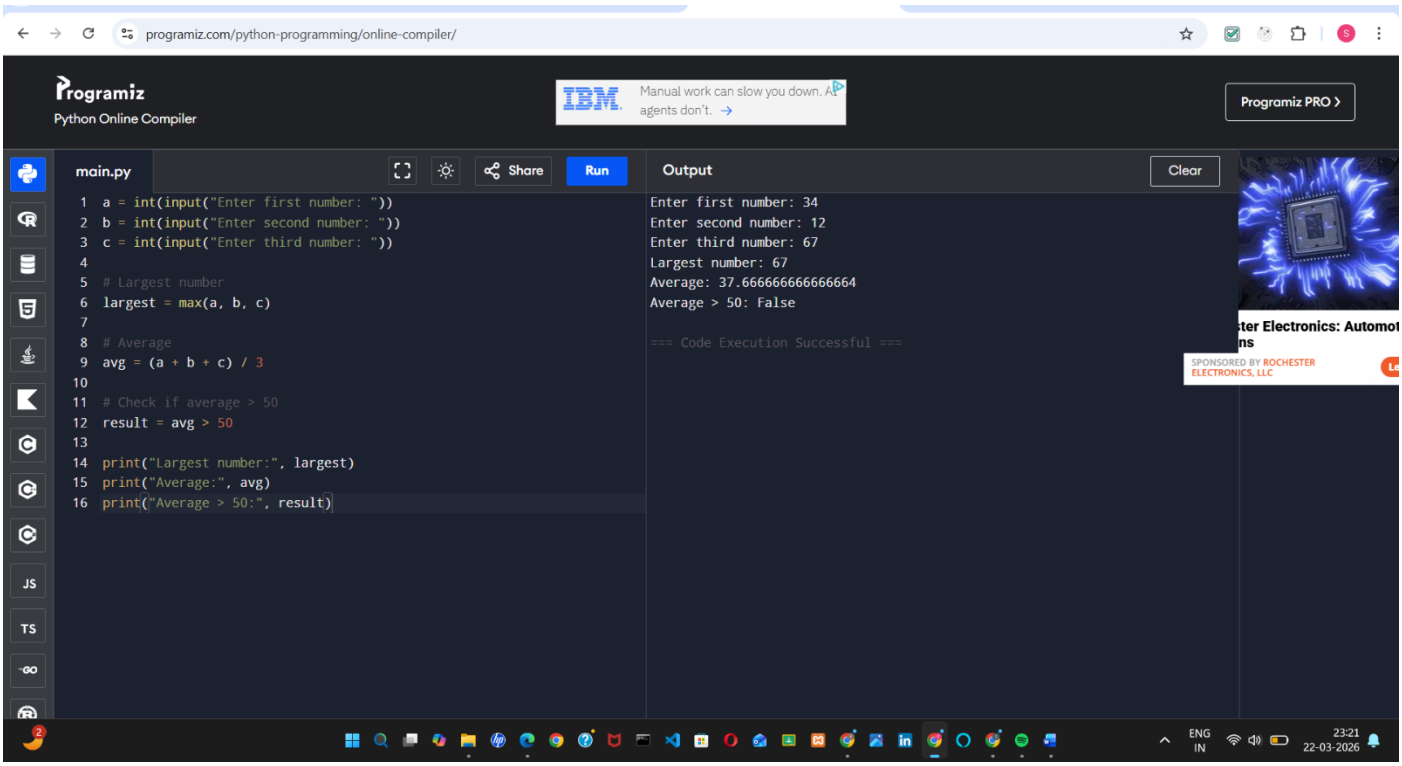
Subject – Data Science

Assignment 2: 16th March, 2026

Topic – Basic Python

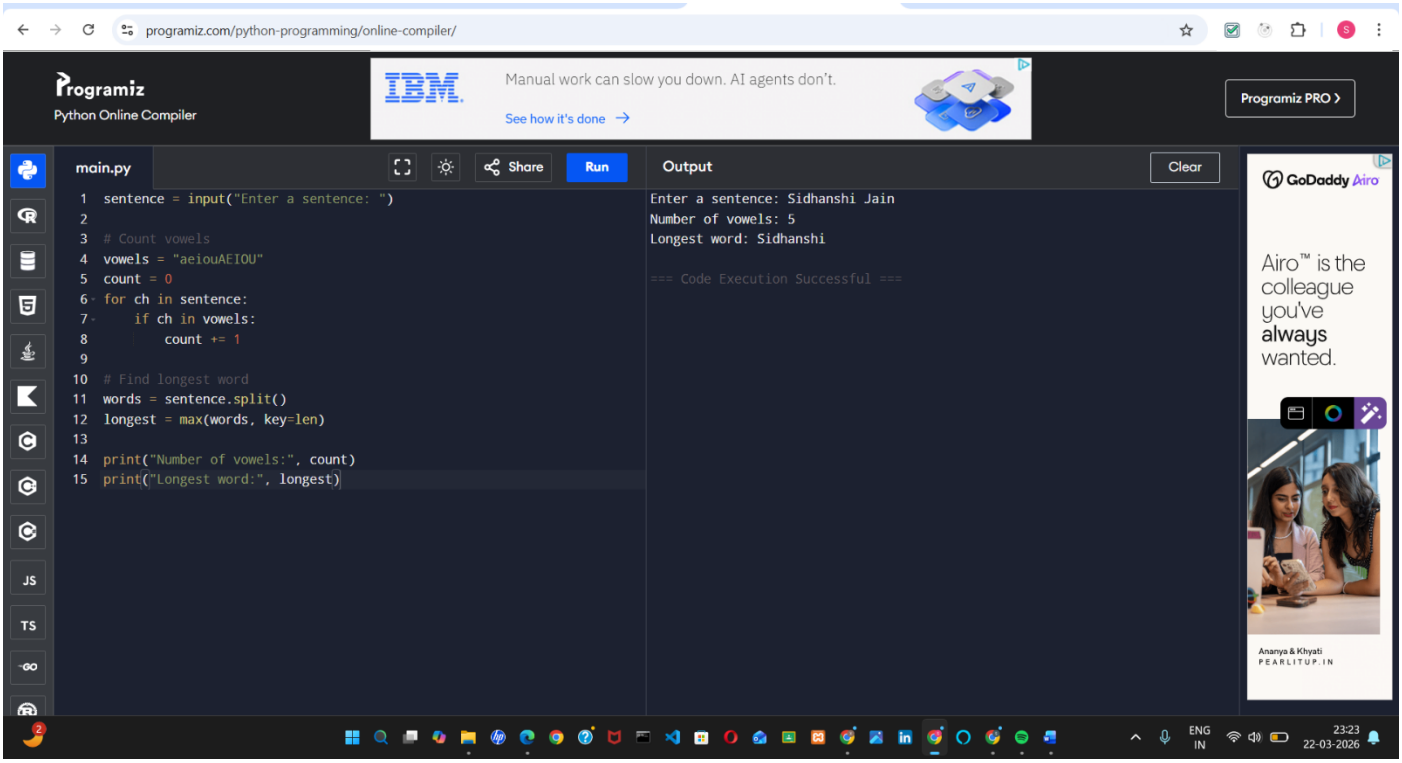
1. Write a Python program that takes three numbers from the user and prints:
   - The largest number
   - The average of the numbers
   - Whether the average is greater than 50 or not (True/False)

Ans.



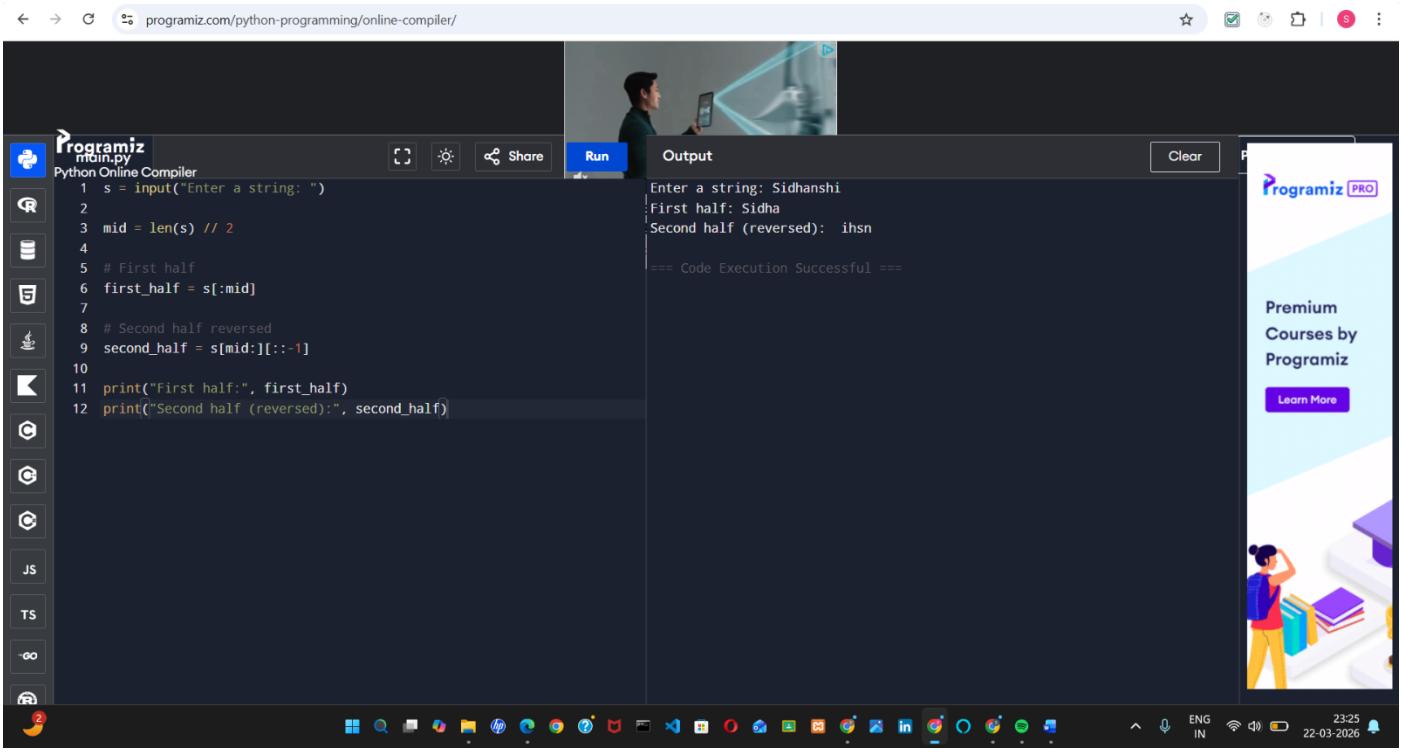
2. Write a Python program that takes a sentence as input and:
    - Prints the number of vowels in the sentence
    - Prints the longest word in the sentence

Ans .



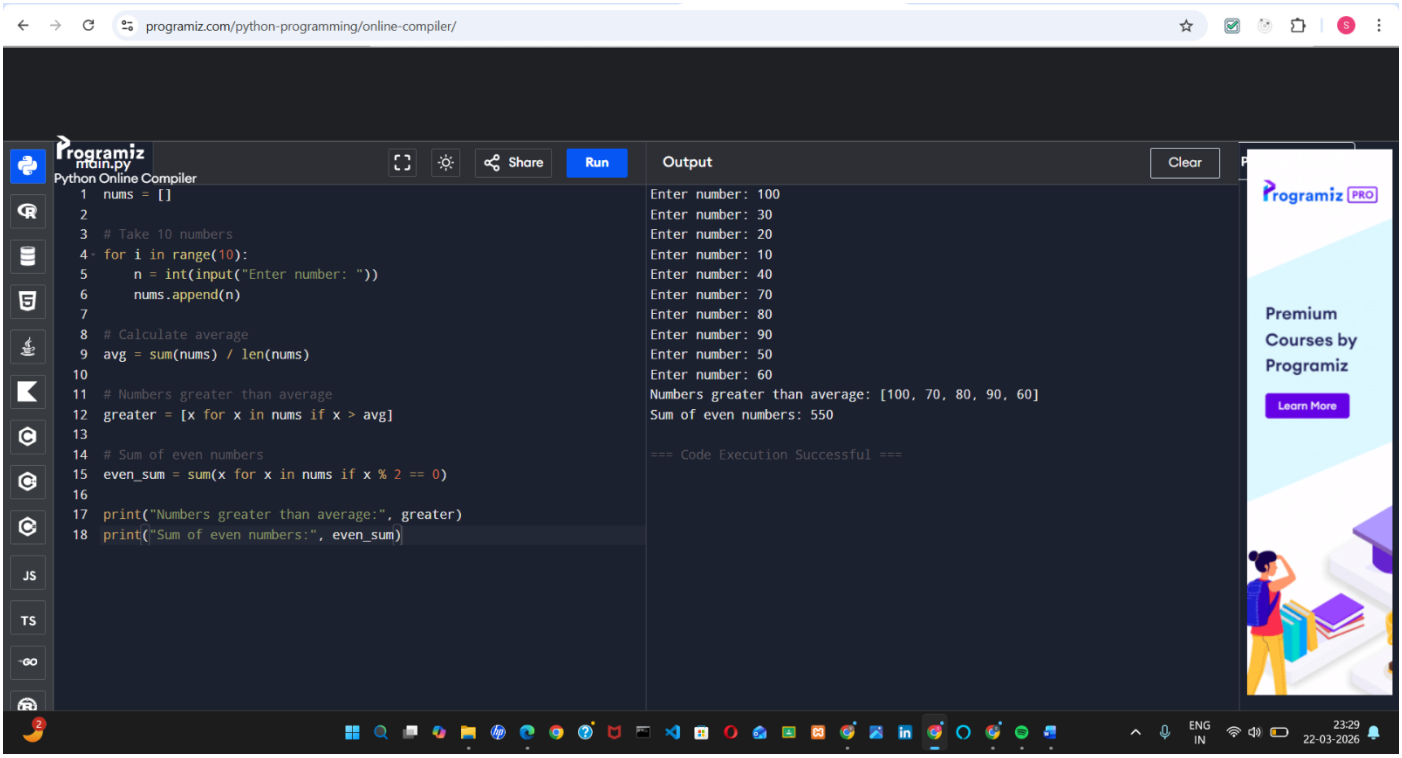
3. Write a program that takes a string from the user and:
    - Prints the first half of the string
    - Prints the second half in reverse order

Ans.



4. Create a program that takes 10 numbers as input in a list and:
    - Prints the numbers greater than the average
    - Prints the sum of only even numbers

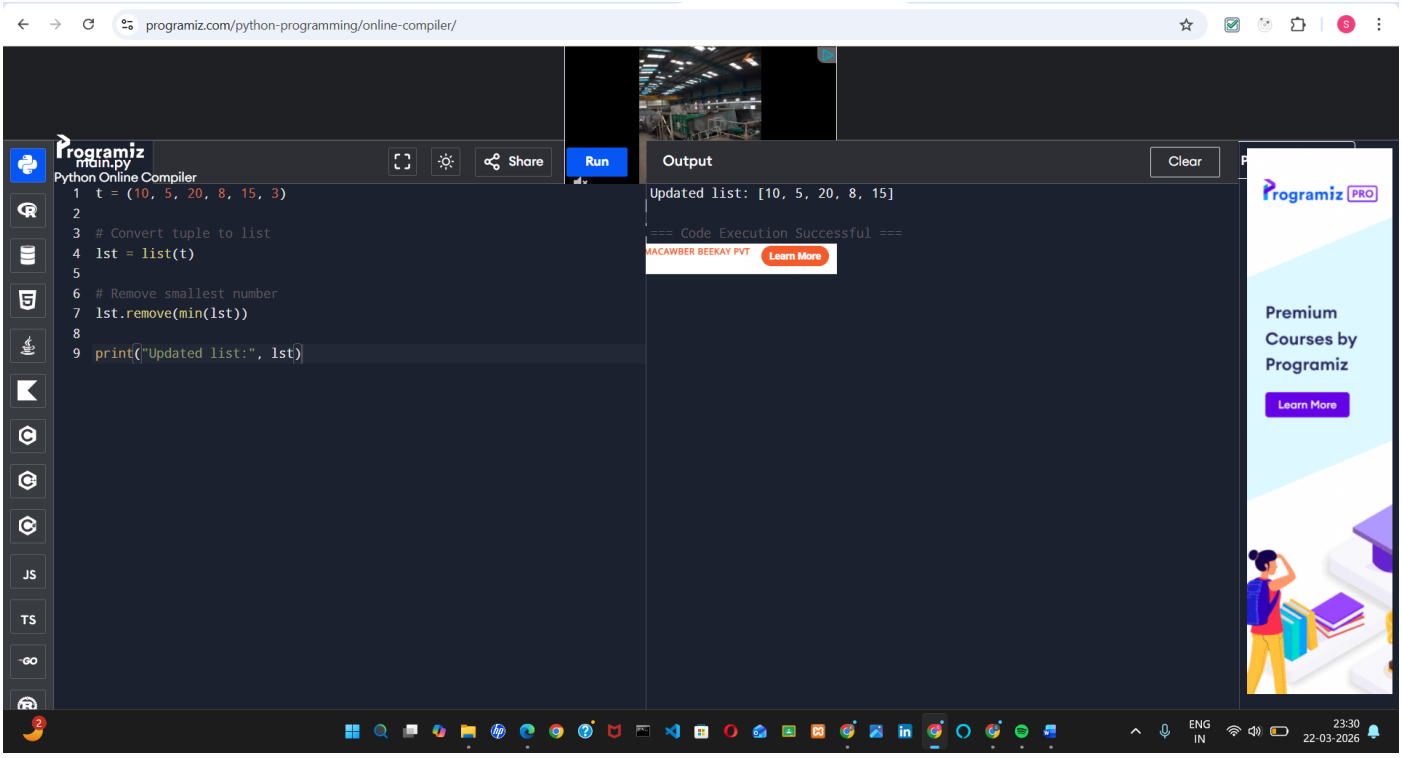
Ans.



5. Create a tuple containing 6 numbers. Convert the tuple into a list, then:

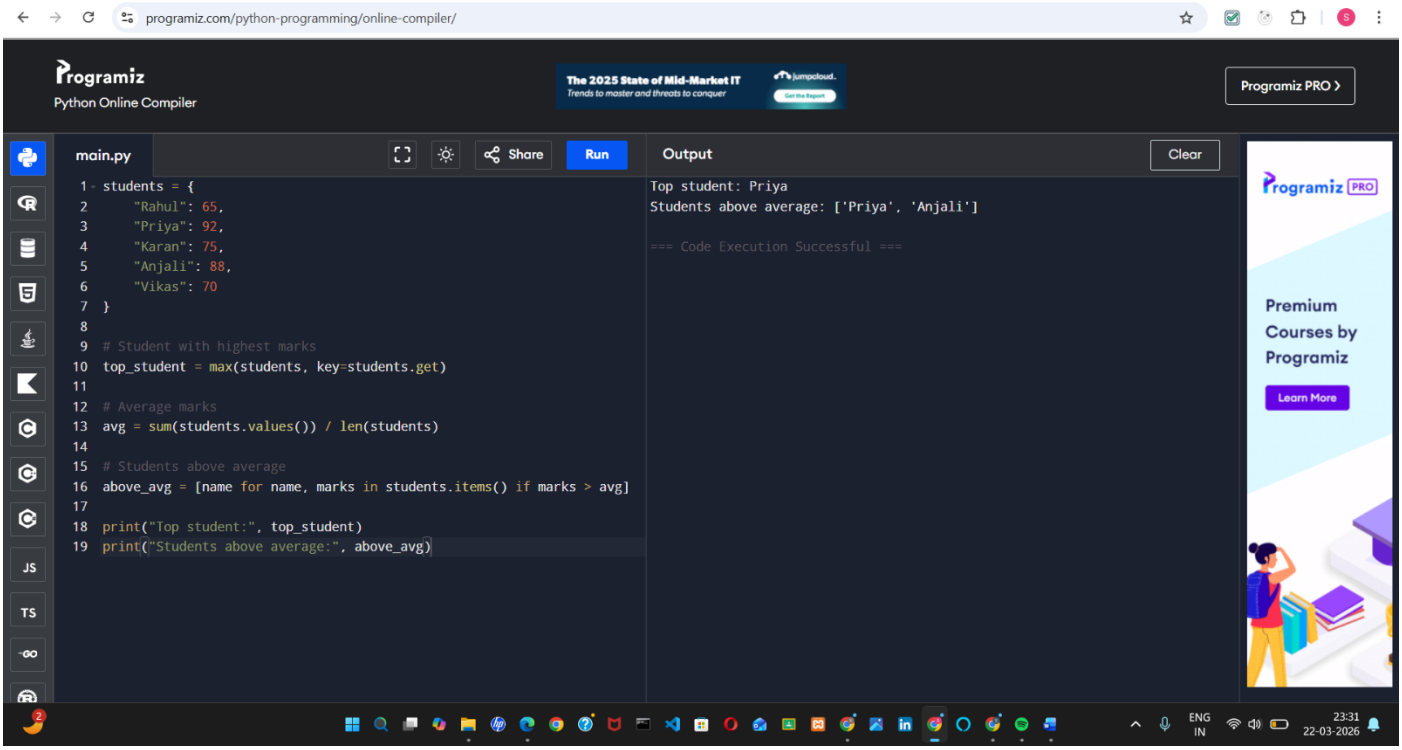
- Remove the smallest number
- Print the updated list

Ans.



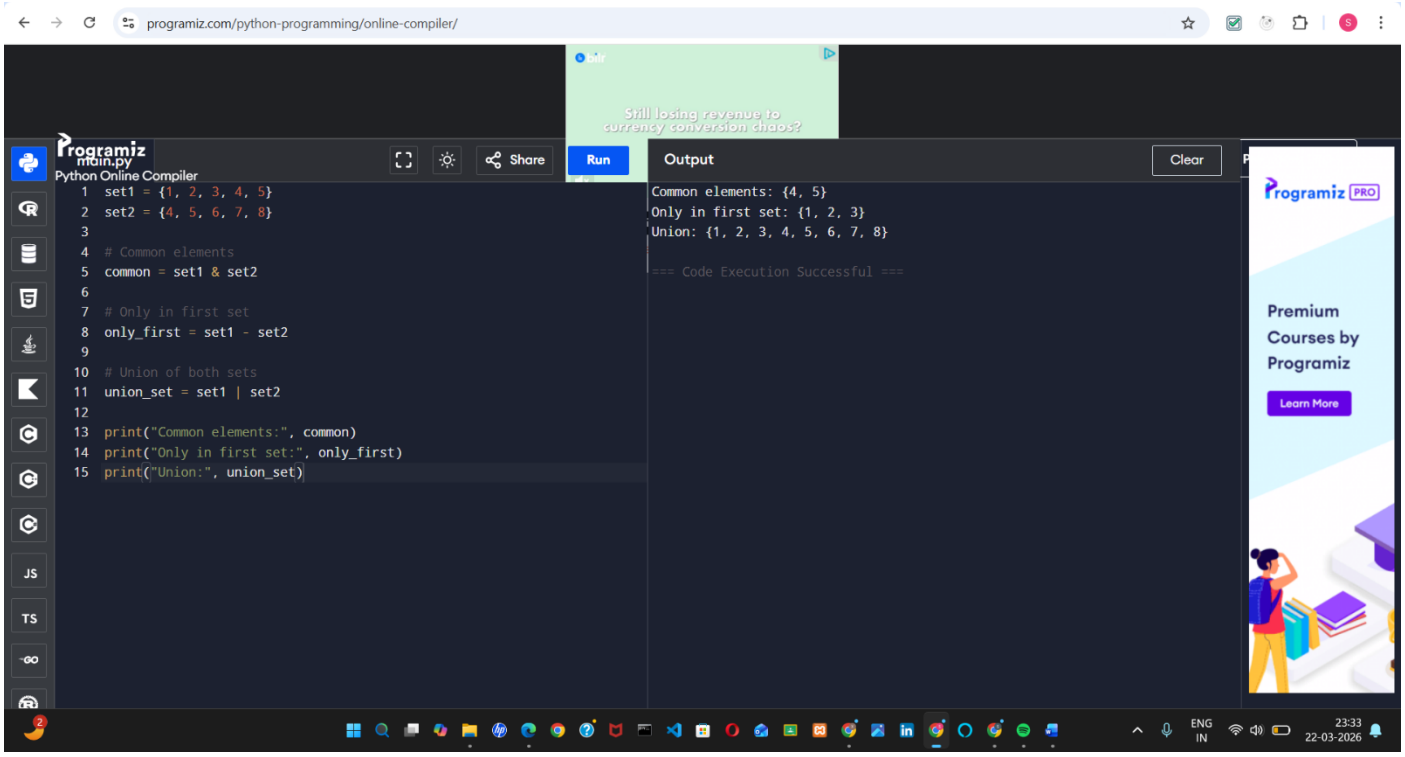
6. Create a dictionary containing 5 students and their marks. Write a program to:
    - Print the student with the highest marks
    - Print all students who scored above the average

Ans.



7. Create two sets of numbers and perform the following:
    - Find common elements
    - Find elements present only in the first set
    - Print the union of both sets

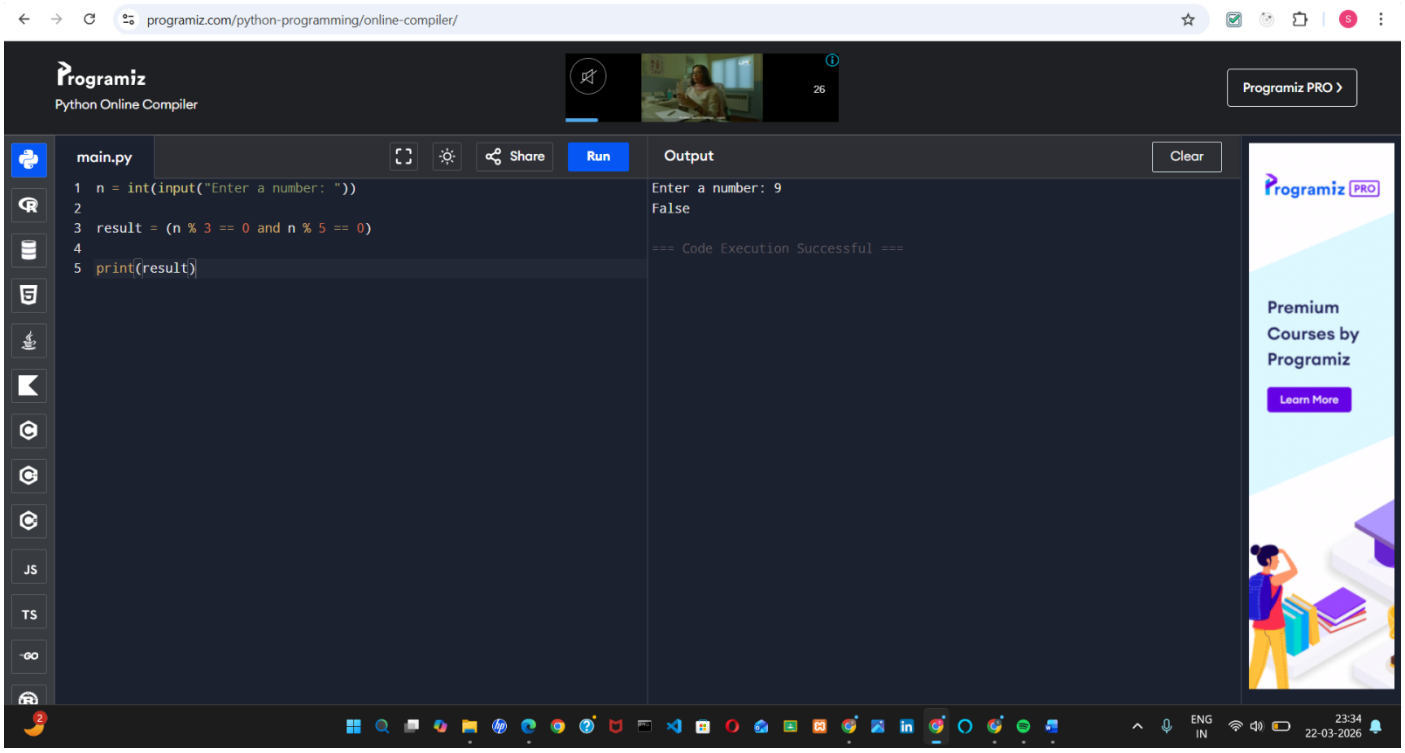
Ans.



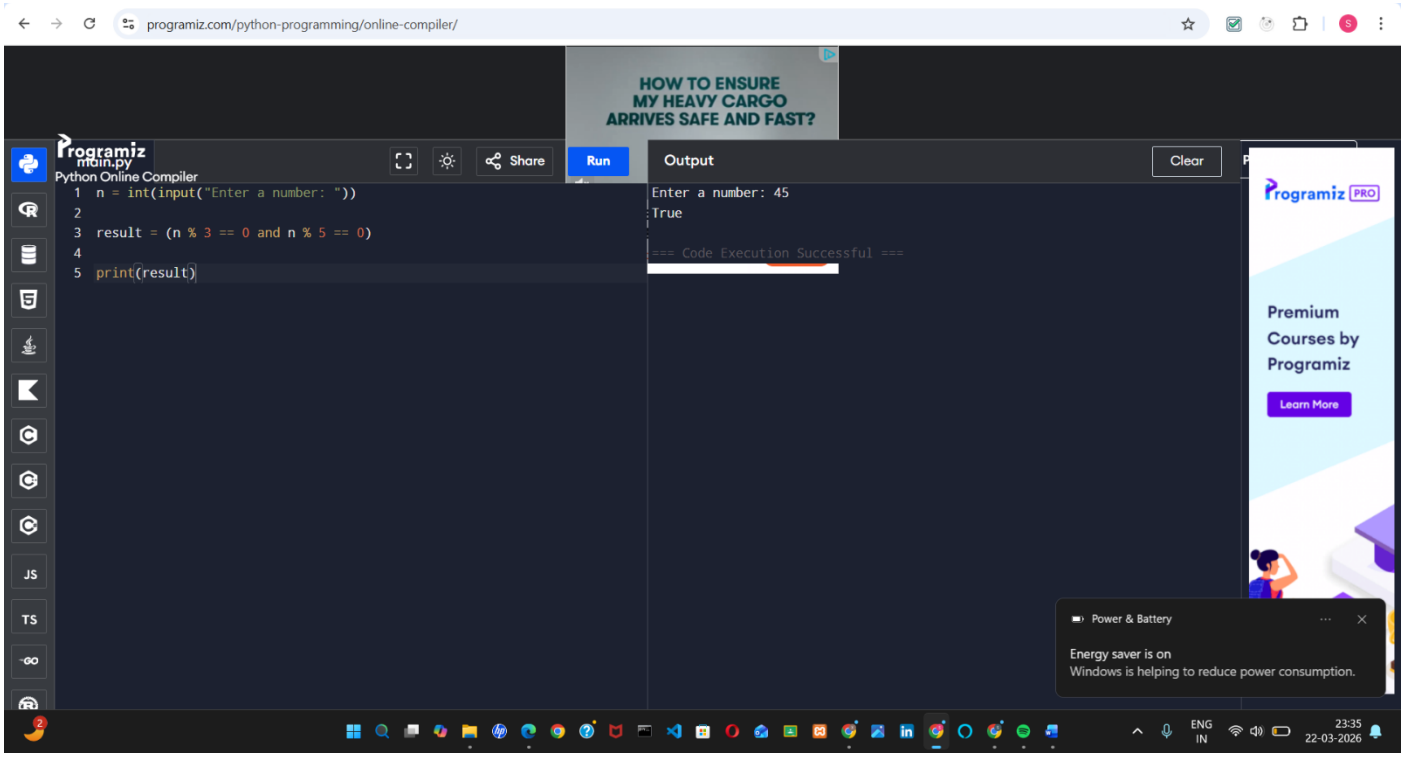
8. Write a program that takes a number from the user and prints:
    - True if the number is divisible by both 3 and 5
    - Otherwise print False

Ans .

a. When Number is not Divisible by 3 and 5



b. When Number is Divisible by 3 and 5



9. Write a program that takes a person's age and monthly income as input and decides the loan eligibility using the following rules:
    - Age < 21 → Not eligible
    - Income < 25,000 → Low eligibility
    - Income between 25,000–50,000 → Medium eligibility
    - Income > 50,000 → High eligibility

Ans.

Programiz PRO

main.py

```python
age = int(input("Enter age: "))
income = int(input("Enter monthly income: "))

if age < 21:
    print("Not eligible")
else:
    if income < 25000:
        print("Low eligibility")
    elif income <= 50000:
        print("Medium eligibility")
    else:
        print("High eligibility")
```

Share Run

Output

```
Enter age: 24
Enter monthly income: 21000
Low eligibility

=== Code Execution Successful ===
```
